### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Denis Maloney on 2/25/11.

The application has been amended as follows:

In the claims:

1) please amend claim 1 to recite the following:

A portable container that supplies a source of fuel to a direct methanol fuel cell, the container comprising:

a housing provided by a plurality of walls, each of the walls of the housing of a vapor impermeable material, the walls of the housing defining a fixed interior space confining a vapor and having at least a portion of a first one of the walls of the housing being comprised of a thermally conductive material and remaining portions of walls of the housing being thermally insulating;

a fuel egress port member supported by a second, different one of the walls of the housing, the fuel egress port member having a single passage through the second, different one of the walls of the housing; and

a surface area enhanced planar vaporization membrane disposed in the housing of the container, with the surface area enhanced planar vaporization membrane and a

Art Unit: 1729

substantial fixed portion of the fixed interior space of the housing confining and being in direct contact with a liquid source of an oxidizable fuel, and the egress port member being isolated from the liquid source and delivering the oxidizable fuel in a vapor phase from the container.

2) Please amend claim 11 to recite the following:

A portable fuel cartridge that supplies a source of fuel to a fuel cell, the fuel cartridge comprising:

a housing, of vapor impermeable walls, the walls of the housing defining a fixed interior space to confine and to be in direct contact with a liquid source of an oxidizable fuel, the housing having walls that define the fixed interior space and having at least a portion of a first one of the walls of the housing comprised of a thermally conductive material with remaining walls of the housing comprising a thermally insulating material;

a surface area enhanced planar vaporization membrane residing in the cartridge; and a fuel egress port member supported by a second, different one of the walls of the housing of the cartridge, the fuel egress port member providing an egress through the second, different one of the walls of the housing with the at least portion of the first wall of the housing sinking heat generated from external components to enhance a delivery rate of the liquid source of oxidizable fuel in a vapor phase to the egress port of the cartridge.

3) please cancel claims 4, 13, and 26;

***Response to Amendment***

2. The amendment filed on 1/4/11 along with the amended claims 1 and 11 recited above, overcomes all previously set forth rejections.

3. Claims 1-3, 5-12, 14, 15, and 20-25 are allowed.

The following is an examiner's statement of reasons for allowance:

Deinzer et al (US 2006/0172171) discloses a fuel cartridge comprising a housing "1b" provided by a plurality of walls, each of the walls of the housing of a vapor impermeable material, the walls of the housing defining a fixed interior space, in direct contact with a liquid source of an oxidizable fuel, and having at least a portion of a first one of the walls of the housing being comprised of a metal (thermally conductive material); an outlet device "1a" (egress portion member) supported by a second, different one of the walls of the housing, the outlet device having a single passage through the second, different one of the walls of the housing. Hirsch et al (US 2004/0209133) discloses a removable fuel cartridge that includes a methanol delivery film (surface area enhanced planar vaporization membrane) that causes liquid methanol in the fuel cartridge to undergo a phase change to a vaporous fuel before it is delivered to the fuel cell.

However, none of the prior art references disclose the remaining walls of the housing comprising a thermally insulating material which implies that a second, different one of the walls, supporting the fuel egress port member is comprised of a thermally insulating material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony Chuo whose telephone number is (571)272-0717. The examiner can normally be reached on M-F, 9:00AM to 5:30PM.
